1. I want to make sure a six foot fence will be installed around the whole apartment complex. It has been said it would be, but I would like an assurance.
2. We would like to have speed bumps on the access road from Textile. We already have speeding issues on Textile itself.

3. Textile Ave is a narrow road, with places sinking in. (Notably right about 7000 Textile) I am very worried that heavy construction equipment will damage the road even further. We also wonder how anything larger than a garbage truck will make the 90 degree turn into the access road.

I understand that despite all of the above, this will probably go through. I am just trying to mitigate the effect it will have on us, placing this development right in the center of an older established neighborhood. Most of the people here love our peace and quiet. Most of us have at least 1 acre that needs to be protected. This will affect our quality of life, our property values, our traffic flow, and infrastructure.
