To whom it may concern,

Hyoco's Electronic Message Centers comes with our proprietary software system. It enables the user to turn off the sign during any time of the day, such as the required 9pm to 7am EST. The software is also able to limit the Static Message Hold Time to 20 seconds before it changes the message.

Last but not least, all EMCs are equipped with auto dimming capability, to adjust the brightness according to the ambient light as required. The brightness output can be set at any level, such as within 0.3 foot candles of the ambient light.

Sincerely,

Chwan Wang
Operations Manager
