

Living With Purpose Meeting Among Neighbors Notes

Concerns

Do they have to buy their own food?

There are a lot of transitional homes.

150 transitional homes in their neighbors

They think most people are in it for the money.

They tend to think that people from these transitional homes are not monitored, and people are knocking on their doors (don't really understand why they think this is from the house)

The house rules don't apply to them because it is in house.

The homeowners should have been notified prior to them moving in

They lower my property value with the transitional homes steady taking over.

Ms. Molly Clark is on the zoning and not doing anything about these transitional homes moving in this neighborhood dropping the value of their houses.

Council woman Purvis has some concern about not being notified ahead of time and still running and she don't want them there. Why do everyone keep coming to the west end where it is cheaper and not in St. Matthew or the Highland.

The safety of the community/loosely supervised

These are the things they need.

1. A Conditional Use permit.
2. Revenue
3. 941

One of the house mates spoke about his experience with living in the house and having been clean for an entire year and how they saved his life in this neighborhood.

The only resolution is not to move into their neighborhood, they do not need to discuss drug problems and a different topic.

We are renting so why isn't the homeowner not at this meeting since they are renting

Meeting is adjourned at 7:30pm
